SUMMARY

React Native developer with **3+ years** building cross-platform mobile apps — **15+ built from scratch, 8 released to the App Store and Google Play**. Frontend is my core: turning designs into production UI and wiring it to APIs, payments and device hardware. I take products end to end when a project needs it, using Cursor and Claude Code to work beyond my core stack with review, not guesswork.

SELECTED ACHIEVEMENTS

- Sole frontend developer on Tapy Aman, a GPS-smartwatch safety app for a UAE client — live on both stores and in its second year of continuous delivery.
- Sole developer on a restaurant POS system at Astapor Technologies: the React Native phone and tablet apps, plus the Laravel API, MySQL schema and web admin dashboard behind them, built AI-assisted and reviewed as I went.
- Built Lumo, an AI photo editor, with an on-device path that resolves supported edits locally and calls cloud inference only when the model is genuinely needed — keeping per-edit cost off most operations.

TECHNICAL SKILLS

Core stack React Native (CLI & Expo), JavaScript, Redux, reusable component architecture

Also build in SwiftUI, Flutter, UIKit (Storyboard), Android (Java, XML layouts)

Integrations REST APIs, Firebase (Auth, Firestore, Storage, Cloud Messaging, Analytics), Supabase

Monetisation In-App Purchases, subscriptions, RevenueCat, Google AdMob, rewarded ads

Growth Deferred deep linking, Play Install Referrer, ChottuLink, Universal & App Links

Device features Push notifications, biometrics, geofencing, live location, E2E encryption, Arabic RTL

Full-stack, AI-assisted PHP Laravel, MySQL schema design, REST API design, role-based access control, admin dashboards

Release & tools Play Console, App Store Connect, TestFlight, Git, Postman, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

Mobile App Developer

Raytech Labs | Remote | May 2026 – Present

- Settle It — built from scratch in Expo: two people submit opposing arguments and a judge persona returns a structured verdict, with a public feed where voting is gated until the ruling.
- While You Slept — built from scratch in Expo: an overnight news briefing. Supabase Edge Functions ingest on a schedule, a cheap model scores and de-duplicates, and only the survivors reach the stronger model to narrate.
- Also maintain production iOS (UIKit) and Flutter apps — features, release-blocking fixes and performance, with design, backend and QA in Git workflows.

SwiftUI & React Native Developer

Astapor Technologies | Sialkot, Pakistan | Feb 2025 – Present

- Restaurant POS as sole developer: React Native phone and tablet apps, and — AI-assisted — the Laravel REST API, MySQL schema, RBAC and web admin dashboard.
- Lumo — AI photo editor: natural-language edits via a hosted model, on-device batch processing to avoid inference cost, subscriptions and rewarded-ad unlocks.
- Lantis — live encrypted messenger: E2E messaging and video calling, auto-delete timers, off-device vault, biometric login, Refer & Earn.
- Kindr — donation marketplace: category-matched feed, distance ranking, request-to-handover flow, ratings and reputation.

Freelance React Native Developer

Independent | Remote | Mar 2025 – Present

- Tapy Aman (live, iOS & Android): real-time location map, geofencing with entry/exit alerts, SOS and fall alerts, device controls, Arabic RTL localisation.
- Referral system with deferred deep linking: a shared link or QR routes to the correct store and the referral code still resolves on first open after install — Play Install Referrer API on Android, ChottuLink SDK on iOS, with no paid attribution platform.
- A&S CQC — Italian-language exam trainer with search across the whole question bank and in-place match highlighting.

React Native Developer

Balawal IT House | Sialkot, Pakistan | Sep 2024 – Jan 2025

- Built Gaazer (creator marketplace: timed bidding, earnings and withdrawals, in-app chat) and IsFit (AI-assisted routines, resumable sessions, video leaderboard).
- Can Dogs Eat It — headless WordPress content client with dog-profile personalisation, weather-driven care feed and push notifications.
- Insucalc — carbohydrate tracker chaining Google Cloud Vision food recognition into an OpenAI nutrition lookup.
- Released to Google Play, the App Store and TestFlight.

React Native Developer

Balawal IT House | Sialkot, Pakistan | Sep 2023 – Apr 2024

- Built My Order from scratch — field-sales app for onboarding restaurants, with a commission dashboard and weekly earnings breakdown.

React Native Intern

Balawal IT House | Sialkot, Pakistan | Jul 2023 – Sep 2023

- Reusable React Native components, Firebase and REST API integration, Git and Postman.

EDUCATION & CERTIFICATIONS

BSc Information Technology — University of Sialkot • 2020 – 2024

Intermediate, Pre-Engineering — Army Public College, Sialkot Cantt • 2017 – 2019

React Native Internship, Certificate of Appreciation — Balawal IT House • 2023, 2024
